

STANDARD OPERATING PROCEDURE FORM

Document Number: FRM-015-01

Effective Date: 01-MAY-2026

Version Number: 01

Page: 1 of 5

Title: 21 CFR Part 11 Assessment Form

Date:		System Owner:	
System Name:		Module:	
System GAMP Category:		Department:	

SECTION A	GENERAL SYSTEM INFORMATION	PART 11 Section	YES/ NO/ N/A	COMMENTS
1.	Does the system create, modify, control, maintain, or transmit e-records/ e-signatures required by GxP rules? If yes, then Part 11 regulations apply.	11.1(a-f) 11.2		
2.	Is the system considered a data acquisition tool (DAT) used for GxP purposes, such analysis and reporting to regulatory authorities?	ICH E6(R3)		
3.	Do users directly control user access to this system? - If no, it is an open system; complete Section C - If yes, it is a closed system; skip Section C	11.10		

SECTION B	REQUIRED CONTROLS (applies to all closed and open systems)	PART 11 Section	YES/ NO/ N/A	COMMENTS
4.	Will the system be validated in accordance with lifecycle methodology per established procedures?	11.10(a)		
5.	Will the system be placed under change control per established procedures once it is placed into production?	11.10(a)		
6.	Can the system generate accurate and complete copies of records in both human-readable and electronic formats?	11.10(b)		
7.	Does the system have written procedures for backup, archival, and retrieval and transfer of electronic records?	11.10(c)		
8.	Are integrity-checking utilities used to verify the accuracy of electronic records that are copied and/or transmitted?	11.10(c)		
9.	Is stored data checked for accessibility, readability, and accuracy?	11.10(c)		
10.	Is access to data ensured throughout the retention period?	11.10(c)		
11.	Are physical and/or logical controls in place to restrict access to the system to authorized persons only?	11.10(d)

Title: 21 CFR Part 11 Assessment Form

SECTION B	REQUIRED CONTROLS (applies to all closed and open systems)	PART 11 Section	YES/ NO/ N/A	COMMENTS
12.	Does the system automatically disconnect a session or require re-authentication after a pre-defined period of inactivity?	11.10(d)		
13.	Does the system have system-generated time-date-stamped audit trails that are retained as for long as the electronic records?	11.10(d)		
14.	Are date-time stamps standardized against a valid time standard?	11.10(d)		
15.	Do the audit trail records record the time, date, user ID, value, and action when a user creates, modifies, or deletes an electronic record and preserve previously recorded information?	11.10(c)		
16.	Does the system record the actions of creation, change, and cancellation of access authorization?	11.10(c)		
17.	Does the system use operational checks to enforce step sequencing?	11.10(f)		
18.	Is the system used for recording certification and batch release? • If "Yes," does the system only allow Qualified Persons to certify the release of batches and clearly identify and record the person releasing or certifying the batches?	11.10(g)		
19.	Does the system use <i>device</i> or <i>built-in checks</i> to verify identity and access privileges of devices or external systems that transfer data or work instructions?	11.10(h)		
20.	Do the individuals who develop, maintain or use the system have appropriate education or experience and have completed training records?	11.10(i)		
21.	Are written accountability policies and procedures established and followed to deter electronic record and signature falsification?	11.10(j)		
22.	Are distribution, access, revision, retention, and use of written system operations and maintenance procedures controlled?	11.10(k)(1)		
23.	Does the system documentation have written revision control procedures to maintain a time-sequenced audit trail?	11.10(k)(2)		
24.	Does the system generate appropriate and adequate metadata according to current regulatory requirements? E.g., audit trails	ICH E6(R3)

Title: 21 CFR Part 11 Assessment Form

SECTION C	ADDITIONAL CONTROLS (applies only to open systems)	PART 11 Section	YES/ NO/ N/A	COMMENTS
25.	Can the system encrypt electronic records that contain confidential information?	11.30		
26.	Does the system use digital signature standards? • If "Yes," record the name of the standard in the Comments Section.	11.30		

SECTION D	ELECTRONIC SIGNATURE CONTROLS (applies to systems that use electronic signatures)	PART 11 Section	YES/ NO/ N/A	COMMENTS
27.	Do e-signatures show the signer's printed name?	11.50(a)(1)		
28.	Do e-signatures show the time and date of execution?	11.50(a)(2)		
29.	Are date-time stamps standardized against a valid time standard (ex: GMT or UTC)?	11.50(a)(2)		
30.	Do e-signatures include a <i>meaning</i> associated with each signing?	11.50(a)(3)		
31.	Do the human-readable forms of e-records display the signer's name, time-date of execution, and meaning of execution?	11.50(b)		
32.	Are the e-signatures non-removable, non-modifiable, and an integral part of the e-records?	11.70		
33.	Are e-signatures appropriately linked to corresponding electronic records?	11.70		
34.	Have the identities of individuals been verified before e-signatures are issued?	11.100(b)		
35.	Do e-signatures, not based on biometrics, employ two distinct components? (ex: user ID & password)	11.200(a)(1)		
36.	Does the system require at least one e-signature component to be re-applied during a series of signings in a single controlled session?	11.200(a)(1)(i)		
37.	Does the system require all e-signature components to be used when a series of signings are not in a single controlled session?	11.200(a)(1)(ii)		
38.	Is the system capable ensuring that an e-signature is unique and is not reused or reassigned to anyone else?	11.100(a) & 11.200(a)(2)

Title: 21 CFR Part 11 Assessment Form

SECTION D	ELECTRONIC SIGNATURE CONTROLS (applies to systems that use electronic signatures)	PART 11 Section	YES/ NO/ N/A	COMMENTS
39.	Are biometric-based e-signatures verified to be only usable by their genuine owner?	11.200(b)		

SECTION E	IDENTIFICATION CODES AND PASSWORDS CONTROLS (applies to all systems)	PART 11 Section	YES/ NO/ N/A	COMMENTS
40.	Are a combination of ID codes and passwords unique for individual users?	11.300(a)		
41.	Are ID codes and password issuances periodically checked, recalled, or revised?	11.300(b)		
42.	Do loss management procedures exist to de-authorize lost, stolen, missing, or otherwise compromised security tokens or cards?	11.300(c)		
43.	Does the system deactivate (block) a user account after a series (ex: 5 or less) of consecutive failed attempts to login?	11.300(d)		
44.	Are security tokens/ cards/ devices initially and periodically tested to ensure that they function properly?	11.300(e)
